WEARPARTS CATALOGUE

atc group

Standard replacement wearparts and tungsten carbide hard faced wearparts for

- Rotary Hoe Blades
- Power Harrow Blades
- Ripper Shanks & Assemblies
- Plough Discs & Coulters
- Points & Sweeps
- Mulching Hammers
- Flail Blades
- Forestry Mulcher Wearparts
- Wood Chipper Blades
- Slasher Blades
- Stump Grinding Teeth & Holders
- Auger Pilots & Teeth
- Trencher Teeth
- Sod Harvester Blades
- Aerator Tines
- Horizontal Grinder Wearparts
- Custom Hardfacing Service
- Custom Castings & Forgings
- Fasteners & U-Bolts

About ATC Group

ATC GROUP head office is located in Brisbane Australia. For over two decades we have been one of Australia's most respected component and wearparts manufacturers. Our reputation as Australia's premier hard facing and custom wearpart company has resulted in wearpart sales into NZ, Canada, USA, and the UK. Allocating a percentage of turnover to R & D projects enable us to continually develop and improve our parts and procedures. Our relationships with Australian agricultural companies has grown over the years as customers realise the ATC GROUP philosophy is simple… we do what we say – every time!

We are genuinely dedicated to what we do. Our team, including engineers, metallurgists and professional welders are always keen to assist with the development of new parts, concepts and procedures. We are always undertaking trials and making prototypes for trialling with our customers. We are more than just a wearparts supplier. We develop, trial and strive to continually improve wearparts for our customers.

Catalogue Contents

Rotary hoe blades	Pages 4-9
Power harrow blades	Pages 10-11
Ripper legs, ripper points, aerator tines	Pages 12-15
Plain, scalloped, fluted labrador discs	Pages 16-27
Coulters	Pages 28-31
Agricultural points & sweeps	Pages 32-39
Mulching hammers	Pages 40-47
Mulching flail blades	Pages 48-53
Forestry mulcher inserts & holders	Pages 54-65
Wood chipper blades	Pages 66-68
Slasher blades	Pages 69-72
Stump grinding teeth, trencher teeth	Pages 73-81
Auger wearparts and trencher teeth	Pages 82-84
Turf cutter & aerator blades	Pages 85-86
Fasteners & U-Bolts	Pages 87-89

CATALOGUE QUICK SEARCH FEATURE

How to use the quick search feature. Simply hold down the "ctrl" key and press "F" for FIND.

A search tool box will appear. Type into the search box what you are looking for, for example "Nobili" and the search feature will display every mention of the word "Nobili" within the parts catalogue :) Quick and easy!

If you cannot find what you are looking for please contact ATC. We will always try to help you.

Phone: 07 3285 7777 or Mobile 0448 588 433

Email: sales@atcgroup.com.au WEB www.atcgroup.com.au

Tungsten carbide hardfacing specialists

ATC are importers and wholesalers of Italian and Spanish manufactured wearparts made from quality European boron steel. ATC can supply standard replacement parts direct from the manufacturer to end users Australia wide and can supply our wearparts with additional tungsten carbide hardfacing or tungsten tile resulting in the longest wearing parts available in Australia today.

Cultivation by its very nature is abrasive and wearpart expenses, unlike commodity prices and rainfall only seem to go one way. The use of tungsten tiles, overlay, hardfacing wires and rods definitely increases the wear life of ground engaging parts.

The problem is - at what cost?

1. **Many tungsten overlay companies charge so much your 1st square inch is worth as much as your point.**
2. **It wears well but increased drag means you need a dozer to pull your rig. Not to mention fuel costs.**
3. **Tiles fall off, break off, crack, splinter and split. When they do stay on, the point washes away everywhere else and the tile is left without a tip to protect.**
4. **More often than not you pay for twice the coating that you really need and end up throwing away hard earned dollars. If you have tried or are using someone else for your wear protection – contact us and we will discuss what you actually need, rather than what makes us the most money.**

We will determine:

1. **What your actual wear issues are.**
2. **Your environment – whether ATC tiles or ATC overlay or a combination may suit your needs. We consider every aspect ensuring we don't create too much drag. We generally don't use tiles in rocky country. When we do, we use a composite that can withstand rock impact.**

We will visit if possible. If not us - we have close ties with 1 independent company in each Australian state that is privy to the same methods we use and has access to our castings and forgings at greatly reduced rates. We will give you a free trial of our product – that will work better than our competitors. Our aim is to supply quality wearparts and save you money and reduce your time and labour costs by you not having to change out wearing parts anywhere near as often.

Rotary Hoe Blades, Cultitiller Tines & Power Harrow Blades

ATC supply standard replacement boron blades and tungsten carbide hardfaced blades for fitment in abrasive conditions such as sandy soils, granite country, and abrasive soil types. ATC tungsten carbide hardfaced blades can be utilised for fitment behind wheel tracks to reduce the need to change out worn blades as often.

ATC's hardfacing process of rotary hoe blades is unique. The placement of ATC's hardfacing enables the blade to wear sharp. ATC's tungsten carbide hardfacing will not break away from the blade, resist impact, and guarantee that you will more than double the life of the blade.

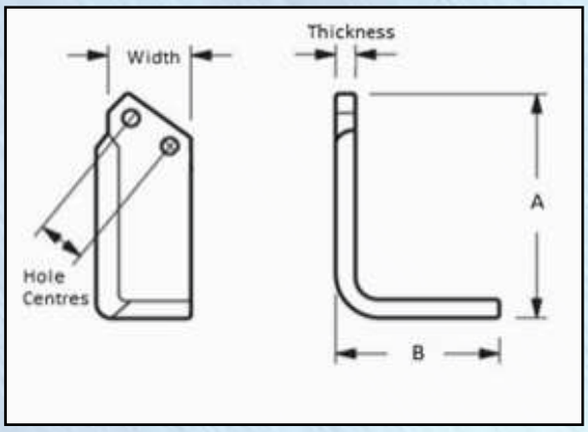
ATC's tungsten carbide hardfaced hoe blades are being used by some of the largest farming entities in the country and are tried, tested, and highly regarded by our ever growing number of customers.

Pictured right; ATC's hardfaced Boron hoe blade undergoing trial compared to non hardfaced Boron blades which can be seen in the back ground completely worn to sharp points. The ATC blade has yet to wear through the tungsten carbide hardfaced section.

Replacement Boron blades with the option of tungsten carbide hardfacing for Agrator, Breviglieri, Celli, Falc, Howard, Krone, Kuhn, Lely, Maschio, Massano, Sicma, Tortella, Valentini and Wecan rotary hoes, bed formers and power harrows.

ATC rotary hoe blades are manufactured from 30MNB5 boron steel and have a Rockwell hardness of 48-52 HRC. ATC hoe blades are manufactured using spherical moulds, this gives the blade a perfectly consistent curvature of the entire blade. This allows the blade, when engaged, to avoid wearing on the back side of the blade, and allows for even wearing of the blade.

ATC also supply tungsten carbide hardfaced blades coated with our unique tungsten grit matrix with trialled and tested placement of the tungsten hardfacing. ATC have conducted many trials with our customers and from these trials we know what works best offering the longest wear life.



Brand	Size A	Size B	Hole Dia	Hole Centres	Width Thickness	ATC P/No	Price Ea Standard	Price Ea Hardfaced

New! Kuhn Cultitiller blades. OEM 52365700 / 52365800. Standard or Hardfaced. ATC Part No A-RHKU79LH / A-RHKU80RH

New! Sicma Antipan blades. OEM 4814515 / 4814514. Standard or Hardfaced. ATC Part No A-RHSI48LH / A-RHSI48RH

Actual results from an Australian producer with over 1,000 hectares under cultivation. Monitored hour and hectare trial using a Kuhn EL 282 rotary hoe, 260Hp tractor, 350 rpm hoe blade speed, travel speed 2.2km per hour. Soil type, red loamy soil. Result - ATC hardfaced boron blades lasted 3.4 times longer compared to a non hardfaced boron blade. ATC Group delivered a 51% decrease of cost per blade to the customer. Additional cost savings of time and labour for the change out of worn blades - 2 change outs of blades were not required. ***"Very impressed"***

ATC power harrow blades are manufactured from 30MNB5 Italian boron steel and have a Rockwell hardness of 48-52 HRC to provide the very best performance in wear resistance. ATC GROUP only supply bolt on applications and do not stock quick fit blades due to patents.

ATC GROUP has always been driven to be the absolute leader in the field of hard facing and tungsten carbide overlay. To achieve this we constantly evolve our process, experimenting with application technology, matrix selection, alloys and pre/post heat treatment regimes.

ATC's tungsten carbide hardfaced power harrow blades greatly extend wear life and saves time and labour cost by not having to change out worn blades anywhere near as often. ATC can also hardface blade holders so you will never need to replace.

Ground Engaging Wearparts

Ripper assemblies, points, shin guards, shear pins, aerator tines.

Our quality cast wearparts are made from high quality nickel Chromalloy steel. The steel we use is a high nickel steel not relying heavily on high carbon levels to achieve hardness. Many companies use high carbon steel instead of nickel to reduce production costs at the expense of ductility and durability. ATC never compromise quality to reduce costs.

ATC tungsten carbide hardfacing on shanks, shin guards and points will greatly extend wear life in the harshest conditions.

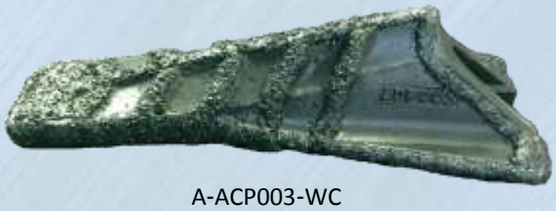
Ripper Leg Mulch Blades

ATC Part No	Description	Price Ea
A-RIMB-K	Mulch Blade Kit	
A-RIMBA-LH	Adapter LH with fasteners	
A-RIMBA-RH	Adapter RH with fasteners	
A-RIMB	Mulch Blade	

The Mulch blade kit includes 1 x LH and 1 X RH adapter with fasteners and 2 x Mulch blades.

Ripper Points

ATC Part No	Description	Price Ea
A-ACP003-WC	Gessner style hardfaced point OEM Ref 7004-026	
A-ACP010-WC	Yeoman style hardfaced point WB-3 wombat	



A-ACP003-WC

A-ACP010-WC

Aerator Tines

ATC Part No	Description	Shattertine style		Price Ea
A-ST5455-LH	Shattertine style LH			
A-ST5455-LH-WC	Shattertine style LH hardfaced			
A-ST5455-LH	Shattertine style LH			
A-ST5455-LH-WC	Shattertine style LH hardfaced			
To fit Aerway, Berends Growmaster, Agrifarm Agrivator, Farmtech and Leda aerators.

Ground Engaging Wearparts

Scalloped Discs

Labrador Discs

Plain Disc

ATC Group supply a complete range of GWT and Agpoint discs and coulters.

Manufactured with a unique boron steel alloy that delivers a Rockwell hardness up to 52 RC without causing brittleness or loss of elasticity.

Compared to high carbon steel, there's just no comparison.

Coulters available in plain, wavy, fluted and radial styles.

Phone: 07 3285 7777 or Mobile 0448 588 433

Abbreviations

PCR = Pitch Circle Radius. To determine PCR measure from centre of centre hole to centre of radial hole
PCD = Pitch Circle Diameter. This measurement is simply the PCR x 2
RCH = Round centre hole
SCH = Square centre hole
F/B = Flat back
SN = Small notch

Tungsten carbide hardfaced disc available from ATC Group!

ATC can supply discs in any size with tungsten carbide overlay to greatly extend the life of plough discs. For more information please contact Paul on email or phone as listed below.

ATC’s plain, labrador “fluted”, and scalloped discs are manufactured from boron steel that delivers a Rockwell hardness up to an astonishing 52 Rc without causing brittleness or loss of elasticity. Compared to high carbon steel discs, there's just no comparison. When discs hit hard objects that they can't cut, it has to yield the right way. It's important for discs to be engineered for the ideal compromise between hardness and flexibility. The discs ATC supply are continually tested for flexibility and have the ability to withstand stress and fractures.

Coulter Types: Plain, Wave, Fluted, Radial

8 wave coulters are suitable for sandy soils because of its waves and great tilled strip width. These do require effort for soil penetration.	12 wave coulters are suitable for sandy, very damp and sticking soils. Less vertical effort to penetrate into the ground than a 8 wave coulter.	25 wave fluted and radial coulters suitable for clay soils regularly used for minimum till. Less effort for soil penetration, good performance cutting straw.	20 wave radial coulters provides excellent vertical cutting of residue good soil penetration and reduce soil stirring and narrow tilled strip.	50 wave fluted and 30 wave radial coulters used for planting grass on no till clayish soils. Good soil penetration, fluted great for straw cutting, superb rotating performance.

Ground Engaging Wearparts

Points & Sweeps

ATC Group supply a range of GWT and Nicols points and sweeps. Each sweep is manufactured from high-quality hardened steel which results in significantly better wear resistance.

To provide you with the absolute best In wear life, ATC also supplies tungsten carbide hardfacing options on the full range of our tillage components.

Contact Paul for more details and pricing on our hardfaced applications.

Ground Engaging Wearparts

Mulching hammers and flails. Forestry mulcher fixed teeth inserts and holders

ATC supply a wide range of replacement hammers and flails for mulchers and flail mowers including brands such as Agrifarm, Agrimaster, Berti, Breviglieri, Cancela, FAE, Falc, Ferri, Kuhn, Kverneland, Howard, Kuhn, Maletti, Maschio, McConnel, M.E.A.A.T, Muthing, Nobili, Omarv, Seppi, Sicma, Zanon, Zenith and more.

ATC's drop forged hammers are extremely strong with excellent wearing characteristics and are excellent in weight conformity. ATC flail blades and hammers are manufactured in Italy and Spain from Boron and cast steels and are designed for high ductility and excellent wear. ATC provide the option of having our range of mulcher flails and hammers coated with tungsten carbide hardfacing to provide you with the longest wearing parts available.

ATC's extensive ranged of fixed forestry mulcher teeth, inserts and holders are drop forged and are supplied with tungsten carbide hardfacing as a standard extra. ATC stock replacements for brands such as AFE (Advanced Forestry), AHWI, Augertorque Bobcat, Bradco, Caterpillar, Diamond, Digga, FAE, Fecon, Loftness, Magnum, Quadco, Rayco, Seppi and more.

ATC drop forged, cast and profile cut teeth and holders are specifically designed for high ductility and excellent wear. Forged teeth are extremely strong, excellent wearing and exhibit excellent conformity in weight and balance. ATC GROUP drop forged and investment cast teeth and holders are made from high alloy heat treated steel. We make holders for all types of grinders, forest mulchers, groomers and shredders. On request ATC GROUP can tungsten overlay the holders to minimise wear. We then reheat treat the holder to ensure the structural integrity of the steel has not been compromised. We also make custom teeth and holder combinations . We often do this when the OEM combination is not up to the harsh Australian conditions resulting in tip loss.

ATC GROUP also designs and manufactures premium quality wearparts for horizontal grinders, tub grinders, forest mulchers, groomers, shredders, chippers and debarkers. ATC GROUP grinder wearparts are currently in service in the industries involved in wood mulching, wood chipping, forest mulching, stone crushing, sugar processing, tyre shredding, plastic grinding, pet food, fertilizer manufacture and feed lots.

AFE	**Advanced Forestry (AFE) Beaver tooth. Suits SS Eco Mulcher, SS Extreme and SS Mini Might mulchers. 2" x 2" shank less with 3/4 NF thread.**	**Part No** I-BT-QH10103T	**Price Ea**
	Replaces OEM part number SBT-200		

Ahwi	**Ahwi style fixed tooth with 2 x tungsten tiles and tungsten overlay. Suits FM, UZM, RM models. OEM part number BFS26. Also suits Fecon.**	**Part No** I-WMF01-2TWC	**Price Ea**
	Bolt M24 (2.0) x 100mm Cone lock nut M24	F-BHM24(2.0)x100 F-NM24Cone

NOTES

MACHINE TYPE	Make / model	ATC PART NO	PRICE EA	QUANTITY REQ'D

ATC Group provides a tungsten carbide hardfacing service to greatly extend the life of slasher blades. ATC slasher blades are manufactured from boron 30MNB5 material and can be supplied as a hardfaced blade alternative. Please call to discuss your requirements with us. There are a variety of hardfaced options available.

All pricing is shown as exclusive of GST.

ATC GROUP harvester blades are manufactured entirely from 30MNB5 European boron steel. Our blades are heavy duty in application and are supplied with a single bevel blade edge sharpened to a razor edge. Our 23" and 24" blades are manufactured with a formed centre blade to provide strength to prevent bowing in hard soil types. The side cutters are also induction hardened making ATC harvester blades the longest wearing in the industry today!

ATC GROUP supply harvester blades to suit:	Part No	Price Ea
16" Ryan, Kesmac, Simpson with no fingers	A-TH16NF

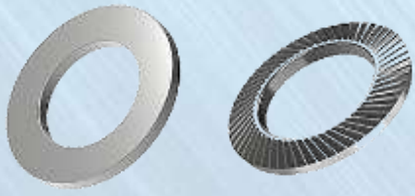
Cap head bolts available in a wide range of sizes. ATC also stock a comprehensive range of standard washers and schnorr washers



Contact ATC for your fastener requirements.

The last few years have seen the world become a smaller place. Easier access to China through the web and low end resellers mean wearparts have drastically come down in price. Some parts have never been cheaper.

There is though, a huge difference between cheap parts at a cheap price and premium parts at a great price. This is the main difference that separates ATC GROUP from the rest. Our products are the highest quality, International standard parts specially manufactured with Australian conditions in mind.

All pricing is shown as exclusive of GST.

30 day trading account available to approved applicants.

HOW TO ORDER

ORDERING

- **Orders can be placed by, email or phone, and we do not require any minimum invoice value. Please note all prices listed in our wearparts components catalogue are exclusive of GST.**
- **All published prices are subject to change without prior notice.**

PAYMENTS

- **ATC GROUP do make available to approved customers, 30 day after end of month trade accounts. For an account application form please contact Paul via email paul@atcgroup.com.au or phone our office on 07 3285 7777.**
- **For non account holders, ATC GROUP accept credit card payments via MasterCard and Visa. ATC GROUP do not store records of your credit card details. Payment by direct deposit via EFT is also available. Our account details and BSB are listed on all invoices.**
- **ATC GROUP accept payment by cheque for account holders only. Our postal address is ATC GROUP 7/34 Paisley Drive, Lawnton Queensland 4501.**

SHIPPING OF ORDERS

- **ATC GROUP delivers orders Australia wide using a variety of shipping companies and all freight charges are clearly quoted prior to despatch of orders. ATC GROUP have developed partnerships with major transport companies and always endeavour to provide you with the most competitive freight rates available for your geographic location. ATC GROUP use Australia post for smaller orders. Bulk orders can be delivered to transport depots for collection.**
- **Orders for standard/blanks parts are generally shipped the next business day.**
- **Orders for parts with tungsten carbide/chromium carbide overlay hard facing are usually despatched within 4 business days.**

TRADING HOURS

- **ATC GROUP can be contacted from 8.30am to 5pm Monday to Friday. We are closed on public holidays and for a short time over the Christmas break.**

Phone: 07 3285 7777 or Mobile 0448 588 433

WARRANTY

WARRANTY POLICY

- **When purchasing goods from ATC GROUP, customers are entitled to assume;**
- **The goods being purchased are of a satisfactory quality.**
- **The goods are fit for all purposes for which they are intended.**
- **The goods are safe and durable.**
- **That where any written description is applied to the good, that they match that description.**
- **Of course ATC GROUP engineers want to solve any issue, so we may ask for the parts to be returned or want to discuss fitment / adapter issues. Some breakages, such as those caused by grinding quartz with your tungsten tipped stump grinder teeth or trying to drill through a buried gearbox with your 8mm auger teeth are not ATC GROUP's fault. For us to keep supplying high quality parts at these great prices we need fair minded customers.**

RETURNS POLICY

- **If the product you choose has been wrongly described, different to the product purchased or doesn't perform as advertised – you are entitled to a refund. In this case ATC GROUP would pay the return freight.**
- **Please choose carefully as we don't give refunds if you just change your mind. That said, we understand sometimes between the machine operator and procurement, errors are made. The wrong parts get ordered etcetera. If this occurs call us or send us an email, explain the situation and we will do our best to help. The customer would bear the cost of returning the freight if the error was not ours.**
- **Parts must be returned in the same condition that they are supplied, and received by ATC GROUP within 21 days of being received by the customer.**
- **Our products are all the highest quality, international standard parts specially manufactured with Australian conditions in mind.**
